## PROJECTS

<b>Paradise, Personal Project</b>	January 2019-March 2019
-----------------------------------	-------------------------

- Paradise is a 4-page restaurant website built with HTML, CSS and JavaScript.
- Developed it completely responsive using flexbox and media queries.
- Project:* <https://github.com/Jeffrey-A/Paradise>

<b>Euler Circuit and Euler Trail, Academic Project</b>	September 2018-December 2018
--	------------------------------

- GUI desktop program that when given a graph (vertices and edges) calculates the degree of each vertex and concludes if the graph has a Euler circuit, Euler trail or neither.
- Built with the python 3 programming language and its GUI Tkinter package.
- Project:* <https://github.com/Jeffrey-A/Euler-Circuit-and-Trail>

<b>Housemate Helper, Academic Project</b>	February 2018-April 2018
---	--------------------------

- GUI desktop program that simplifies the sharing of expenses among a group of housemates and helps them with inventory maintenance.
- Given the names of the individuals, the amount of money spent, and the items bought, the program equalizes the expenses, indicating who owes money to whom as well as allowing the user to indicate if an item was used, thus keeping track of the remaining items.
- Built with the python 3 programming language and its GUI Tkinter package.
- Project:* <https://github.com/Jeffrey-A/HousemateHelper>
